FOR IMMEDIATE RELEASE

ST. LOUIS, MO September 24 -- The **Decorative Concrete Council (DCC)**, a specialty council of the **American Society of Concrete Contractors (ASCC)**, St. Louis, Mo., has announced the winners of its 13th annual **Decorative Concrete Awards** competition. The winners were recognized at ASCC's Annual Conference, September 23, 2021.

Ruttura & Sons Const. Co., Inc., West Babylon, NY won the **WOW! Award**, best overall project, for **Little Island @ Pier 55**, Manhattan, NY. Little Island is a \$250 million Hudson River Park Trust project which takes the idea of piers and parks to a new level. The most visible portion is the pots, fabricated giant cups put together with pieces called petals. 39 sets of formwork were made after extensive 3D computer modeling to create the 132 pots.

While the pots were modeled, cast, and assembled, marine contractors drove the pilings in stages, up to 200 ft. below the river. The project includes a total of 267-cylinder piles, each supporting approximately 250 to 350 tons.

The "jewel" of the project, according to Kevin Zimont, a project executive with construction management firm Hunter Roberts Construction Group, is the 700-seat amphitheater. "Architectural concrete designed for a 100-year life cycle made it difficult to satisfy the architect's wishes," says D. Thomas Ruttura, Ruttura & Sons Const. Co.
